Information Disclosure Statement

2. The Examiner has considered the information disclosure statement (IDS) submitted on 4/13/04.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Wilcox et al. disclose a control circuit and method for maintaining high efficiency over broad current ranges in a switching regular circuit in Fig. 7. A power supply (300), push-pull switch (15), driver (20), output circuit (30) and control circuit (350). See col. 12, line 1 to col. 14, line 10.

monitoring voltage an offset, an output voltage comparator that controls a magnitude of the offset according to a result of comparison between the output voltage and a predetermined reference voltage, wherein the output voltage comparator, in producing from an input voltage the output voltage within a predetermined permissible variation range, controls the magnitude of the offset in such a way that, as the output current increases, the output voltage decreases within the permissible variation range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
